

HALE &amp; CO.

7 and 9 Spring St.

WEEK,

Wednesday, March 31st.

## SUCCESS

These will be on sale on this date, WEDNESDAY, MARCH 31st, several very desirable lots of goods, bought at 50 per cent. of their real value, and which will be closed out at prices that will successfully defy all competition, relating to either quality or style. Remember this fact, that all goods placed on our counters are exactly represented, our wish being to please, and not to deceive. Come early and you will be rewarded by seeing the purchasing public, in HALE & CO.'S, opposite post office.

The Unparalleled Presentation of the Day.

40) Dozen of the Celebrated Nette Corsets at 45 cents Each.

Take into careful consideration that this Corset is silk-stitched, is made of the best material, and which will be constrained to decide with us, that this is the best value ever offered in goods of this kind.

And wonder why we can sell them at such a low figure. The reason is very plain. We buy and sell for those who have enabled us to sell cheaply and still make a profit.

## Parasols! Parasols!

From the house-suburb to the masses' pamper, from the child's umbrella to the woman's parasol, we stand prepared to give you the favor of placing it on the market with gold. It was necessary to provide a further legislation in order to break up the practice in the Treasury Department of repudiating the silver dollar, and to cause their application to the payment of the public debt, principal and interest. When the people declared that the financial policy of the Republicans should be enforced, the mandate was respected and obeyed. The oppressive exactions and extortions of that financial policy, and declared that a party should be formed to effectuate its principles. It seemed that those mandates fell still-born. The people were deprived of the fruits of the great victory, and the series of official dismission, and the interests of all people were sacrificed on the altar of the rich. The people proved that there was no law that required the Secretary of the Treasury to do what he did. He had a brown coat and vest, 160 pounds; hair and beard brown; hair very short; age 40 or 45 years. Burglars' tools were found in his pockets, and he had a set of identification. The Coroner's verdict was that he died of suffocation and exposure while sleeping rid of the house.

## WHO WAS HIT?

A Man from Los Angeles Found Dead at Colusa.

Special Report to The Times.

COURTS.—The dead body of an unknown man was found here to day about 9 a.m., underneath the bed of a car loaded with lumber from Los Angeles, which arrived here about noon yesterday. He had a brown coat and vest, 160 pounds; hair and beard brown; hair very short; age 40 or 45 years. Burglars' tools were found in his pockets, and he had a set of identification. The Coroner's verdict was that he died of suffocation and exposure while sleeping rid of the house.

## TWO DOZEN TIDIES.

We have received direct from the manufacturer one gross of Artistic beautiful patterns at \$1 each.

18 Pieces

Silk Velvets, at 21 per yard. These goods are richly taled and are in latest trimming shades; former price, \$1.75.

100 Dozen

Lace Linen Hose, at 12¢ per pair; guaranteed to be full length and fall length.

50 Dozen Handkerchiefs.

We have selected from our stock this quantity of handkerchiefs, comprising ladies' white hemmed and colored striped hemmed at 12¢ each. Guaranteed to be all linen.

Touches of Dickens.

We print to-day in the Times the second installment of the new serial by Mrs. Palgrave Simpson. This story, "Jean McClure," is the most prominent feature of the work that Mrs. Simpson has done. She has succeeded to put in romance thirty-seven years of life in Colorado, or rather thirty-seven years of the life of Colorado. She has aimed to picture the Colorado of the past and to trace its relations with the present. The author was a teacher, a writer, a teacher, a student, for the study of character, for the development of plot, and for the artistic heading of incident. Materials for a good story are abundant, and Mrs. Simpson has used them to good advantage, and in a way to interest the people of Colorado in her story as a local sketch, and the people of the world at large in her story as a romance of today.

Of her ability to handle the materials there can be little question. She has written a great many stories that have been popular to an unusual degree. Speaking of her last volume, the *St. Louis Republic* said:

"With infinite tenderness she touches the chords of the reader's heart, and with a pen that appears to form of a flood of tears—tears not of sorrow, but of that thrilling anxiety which Bob Cratchit felt when he heard his wife's words, 'It is Christmas night and saw that Tiny Tim was happy; tears such as old Caleb Plummer never wept before. And in the arms of honest John Perryingle—the same tears which clunged the heart of the poor old man who came to find himself alone, and in the midst of Christmas. From the first page we have assumed the key-note of those plaintive songs which humanity feared were dying away in the memory of Dickens."

With infinite tenderness she touches the chords of the reader's heart, and with a pen that appears to form of a flood of tears—tears not of sorrow, but of that thrilling anxiety which Bob Cratchit felt when he heard his wife's words, 'It is Christmas night and saw that Tiny Tim was happy; tears such as old Caleb Plummer never wept before. And in the arms of honest John Perryingle—the same tears which clunged the heart of the poor old man who came to find himself alone, and in the midst of Christmas. From the first page we have assumed the key-note of those plaintive songs which humanity feared were dying away in the memory of Dickens."

The Old Boys are Coming.

The Rochester (N. Y.) Herald has this to say about the preparations we are making for visitors next August: "The California people are extending every courtesy to our entertainers at the Grand Army delegates who will attend the annual encampment in San Francisco. The probabilities are that the delegates will be accompanied by comrades and other visitors until the whole number is swelled into the tens of thousands. The American women, who were in one of the stores on Spring street, while persons boasting down of prowess as such, and many enterprising posts have announced their determination to go to a body. It will be a time for California to advertise itself extensively, and the State will not fail to do it." Will the Grand Army men of Los Angeles bear their share and make arrangements in time for the large index of comrades that will be pretty sure to see in the metropolis of the South?

As a result of the instructions sent to our agents in Europe to gather information in regard to the land troubles existing there, the Copenhagen committee at Copenhagen reports that a belief exists among European philosophers that the prairie farmers are making the same mistake in which their forefathers fell, in not advertising closely enough. It is also believed that the prairie farmers that share barrels of flour can be grown in Denmark on the same area of land that it takes to grow five barrels on our Western farms. The point is made that these farms will, in a comparatively short time, be considerably impoverished, and that the prairie farmers in the markets of the world, for, as the land deteriorates, the cost of production of emigration will continue to raise the price of wheat.

Another fundamental source of trouble in the country of France is the peasant, who, in the opinion of the French government, is a virtual slave. The Moody and Sankey meetings in New Orleans stirred up an enthusiasm in that city greater than anyone known.

## Farm and Range.

ought to Work Both Ways.

Among the readers of the Times and Mirror there are a great many men and women actively engaged in agriculture, and it is to them that these notes "Farmer and Rancher" are addressed. The agricultural column, however, is designed for the consumption of congressional topics. Much space is devoted from week to week to the different phases of agriculture, horticulture, stock-raising, dairying and everything, in fact, which is for the interest and profit of farmers in Southern California. Any new and practical information which comes to us, either in Eastern or Pacific coast extracts or from foreign publications, is classified for the common good. The great difficulty in conducting a department like this is to bring it into intimate relations with the every-day affairs of life. A man shut up in his office four hours out of the twenty-four, whatever his general information on agricultural topics may be, is apt to become a mere theorist. To talk practically about pigs, a man must be near the pigs now and then. The best form of education about farming in my opinion, a man's education should be such as to show him the wants of the calling.

Now, what are we trying to get at this? There are some thousands of intelligent people whose daily experiences are full of suggestions; they read the agricultural department and are interested in it. Why not make the interest mutual? Why should not the members of the agricultural committee of a committee of the whole to investigate every branch of agriculture? When any member of the committee finds out a good thing or a bad thing, that his brother agriculturists should be posted on or warned against, let him at down and make a note of it and forward to this paper. Whenever a knotty question comes up relative to the farm work, let him pose the question to the agricultural department, and if that committee provides it is unable to furnish an answer he will refer the matter to somebody who can. Let all our readers combine in a mutual improvement society, and through the medium of the paper, compare notes on all these matters which engross their daily attention. Thus the work becomes more interesting, more profitable, and we shall help each other to attain a better standard.

Write to the paper. Help along the development that is ripening around us. Give us an account of your successes and your failures. The failures, correctly reported, may be very valuable. Some philosphers has said that the monument of success is built on a foundation of failures. Write anything that interests you, and it is sure to interest others in the same pursuit.

## POULTRY.

**Hatching and Breeding Light Brahmans.** G. M. T. Johnson (in American Cultivator.)

To facilitate a better understanding of this subject, let us first consider what is meant by a Brahman. The John Smith strain of Light Brahmans or the Richard Roe strain of White Brahmans, and we are often asked, "What is a Brahman?" In reply: Yes, but there is still more to tell. The Light Brahmans are the best of the winter fowls, and are the best of winter fowls, another will say they are the poorest layers. One will say they are long lived, another may say they are heavy and, some are particular about the diversity of opinions of the same breed.

This difference will be explained what constitutes a strain. It is well known that the Brahmans and Cochins of various varieties are an importation from the Empire of the Cochinchina or Shanghai, direct from Shanghai, China, about the year 1810, and by the British East India Company. Many of us remember the old China and Shanghai fowls. What odd-looking birds they were! They were popular for a time, and are still under cultivation, though the beauty of the Brahma and Cochins of to-day are from the former.

In breeding them, some chicks come light and some dark, some black, some buff, some single-combed, and some double-combed. By marking the chicks by colors and other markings, year after year, we have now separated the light from the dark Brahmans, Buff, White, Orange, and Black Cochins. Now we see we have these fowls of different characteristics, all by a system of selecting.

But why stop here? Taking the light Brahma as an illustration, why not different qualities of the same breed? The American standard of excellence has said what a Brahman should be, and the English standard is the same.

For a considerable time after cattle began to be abundant in the agricultural papers there were a great many articles that appeared to the student of the art, but did not say how to lay eggs, under favorable circumstances, she should lay in a year, or how many times a year she should lay.

Every breeder has his individual ideas of what a good Brahman should be, while they all try to conform to the standard of the English standard.

Mr. A. and Mr. B. H., too, have conformed to the standard in their selection, but paid more attention to their laying qualities.

The fertility of the soil is the measure of animal life, that may be maintained in a way as out of the water, and the condition of the soil in the country. He has a fowl which lays twenty or thirty eggs before stopping. She lays only a few and from time to time.

Perchance neither of these men has selected fowls for laying qualities, and the other two have done so. Mr. C. obtains fowls from the best stock, and this he has food in abundance, and this is found in the form of insects, plant seeds, root vegetables, in the greatest variety.

The fertility of the soil is the measure of animal life, that may be maintained in a way as out of the water, and the condition of the soil in the country. He has a fowl which lays twenty or thirty eggs before stopping. She lays only a few and from time to time.

Now we can understand how it is that Mr. A. Light Brahmans stand so high, and Mr. B. is so short and light, and Mr. C. is so good.

The foregoing is the result of my personal observations, and I hope to explain much of the diversity of opinions to the different breeds of fowls.

Any one who is a seller of fowls, and I hope to do so, will apply equally to all breeds of fowls.

While carefully observing the build

and markings of fowls for breeding, I would select eggs from the best laying fowls in the place, and every year we can improve on our present stock, every year better layers are every year.

They stand up like carriages. They

are tall and slender.

There are, of course, many other, but minor influences, to be borne in mind in the proper selection of our fowl breeders.

**VITICULTURE.**

**The Wine Men at Work in Washington.** Ben Pease Poos.

Washington has been enlivened by a general interest in wine-making.

The object of the grape-growing was to call the attention to the production of the character of the wines in California, and to effect a legislation which would not be out of the line of the

wine manufacturers by having all wine manufactured labeled so that every bottle will bear a label of a name of a vineyard.

Senator Stanford, of California, who is the largest grape grower in this country, presented at the meeting, and, most recently, as Vice-President. Addresses were made by Senator Atwater, Commissioner of Viticulture for the San Francisco Fair.

The discussion of the demands was to the effect that what was wanted was not prohibition laws, but wise, and right, cheap grapes which would take up a resting and feeding place for numerous water insects with their larvae and adult forms, etc., aquatic plants, are alike destructive to the vegetation of the vine.

Foggy was a little grave yard, and the vine was so young that it had not yet reached the ground.

I described last year, and Charles A. Wetmore, Commissioner of Viticulture for the San Francisco Fair,

the object of the grape-growing was to call the attention to the production of the character of the wines in California, and to effect a legislation which would not be out of the line of the

wine manufacturers by having all wine manufactured labeled so that every bottle will bear a label of a name of a vineyard.

**THE CITY.**

Banning is attaining quite a reputation as a health resort, and many persons suffering from pulmonary diseases, rheumatism, etc., have made it their residence there. Banning has now a fine class hotel in the Bryan Hotel, and a number of smaller ones. Tourists go well to make a noise of this.

Paintings at wholesale to the trade, at Day's music store, the largest music house on the Pacific coast, outside of San Francisco.

Three carloads of piano and organs to arrive at Day's music store that week.

The Dr. H. L. Burkhardt grand piano instruments in the city.

Dr. Burkhardt has just purchased a large estate in the hills above Glendale.

At Dr. Day's music store, 10 West First street.

A fine ride through the country and viewing the most beautiful scenes in the San Joaquin valley for 5 cents.

Colonel Violet returned yesterday, from Omaha and Kansas City, having safely crossed the plains in his carriage on the 15th inst. to their destination. He goes on Saturday, April 2d, as his regular mode of travel for his services.

Near the school, Mayes' Tract, accessible by the hill road, at the first dip, is the Highland View Tract. It will be open to the public on Saturday, April 1st, at 11 o'clock. Read the advertisement. Fine free lands. A bad time to buy land.

Photostat finished gold-edge salamander cases for \$1 per dozen, at Elite gallery, Justus Main and Spring streets.

Wanted to loan money on good security, interest 6%. **S. P. COOPER.**

Lady Duffield, at Hotel Thayer's.

The rehearsals for the May Festival will be held each Sunday evening at the Hotel Thayer's, 750 o'clock, beginning March 25th and concluding May 10th.

All persons who are invited to attend the rehearsal on Monday evenings, call at the Opera Hall in the Grand Opera House, 100 South Spring, those who have musical ability are not known to the management. They will be welcome to sing, and the manager of the choruses to be used in the coming season.

Just received at Parmenter's Bazaar, an invoice of the celebrated Palais-Odeon, the grand hotel in Paris.

The friends of Mrs. J. W. Lewis, 34 Spring street, are cordially invited to call and inspect spring and summer styles of dresses, hats, etc., now on the opening week, beginning March 29th.

Emmettual Swiss cheese at J. Jevons', 34 North Spring street.

Pistachio cream cheese at Jevons', Dresden and London wafer at H. Jevons'.

The largest and best assured stock of Colgate's toilet soap can be found at H. Jevons' and 40 North Spring street.

For the convenience of our patrons, a good assortment of dried, canned and pickled fish at J. Jevons' 34 and 40 North Spring street.

Dried Almond raspberries, blackberries, peaches, apricots, etc., etc., at H. Jevons' 34 and 40 North Spring street.

Snow white sateens cost at H. Jevons' 34 and 40 North Spring street.

Pure French macaroon, celebrated biscuit, in endless variety, can be had at H. Jevons' 34 and 40 North Spring street.

For the convenience of our patrons, a good assortment of dried extract over made, can be had at H. Jevons' 34 and 40 North Spring street.

Emmettual Swiss cheese at J. Jevons', 34 and 40 North Spring street.

White chocolate no equal in this market. H. Jevons'.

Genuine maple sugar at Jevons' 34 and 40 North Spring street.

Cottage lace soap at H. Jevons' 34 and 40 North Spring street.

If you want a house, with nine acres, all in fruit bearing, near street car, schools, etc., call at 34 Spring street, Jevons' call at J. W. Bunting, 80 Main.

Dr. Williams, specialist in diseases of the heart, has a office at 100 North Spring street.

Dr. Upton, Dentist, Schenck's Block.

Dr. Winder Lindau has removed his residence to 448 South Fort street, opposite the Hotel Thayer's, same address as before, at 237 South Spring street.

**BRIEFS.**

Nothing new in the railroad situation.

The Kansas Association meets to-morrow evening.

The Minnesota Association meets next Thursday evening.

Two deaths in the country yesterday.

The weather is cool to-morrow, and the Earthquake.

The sophomore exercises of the University of Southern California take place to-morrow.

The Emperor Savary was an attraction at the Eagle Fair, last night, and gained a great success.

A marriage contract under the laws of this State was yesterday signed between Alessandro Valentini and Senator V. Valentini.

The Hanlons closed their two weeks' engagement at the Grand last night, to a fair house. They have made a good home, and pleasantly remembered.

Capt. James noted his base on the Government Hill, last night, to the 100 or 400 people. He "bounced" the one-legged man, for all he was worth. Several drug stores were open.

Division Superintendent Hinman, of the Mountain Park Railroad, is interested in the construction of a road in the Mojave desert. He has specimens showing fresh tracks of animals.

The Vernon Line's grand "spur" way up the canyon is. It is alleged that on Tuesday evening, the affirmative side really won, but the negative side was awarded the victory. Whether we are yet to see.

E. G. Hayes showed up on the street yesterday with a splint rig, horse, harness and plow—a present from his father, C. H. Holmes, of Denver. Who is here quietly enjoying the glorious climate of California.
